# Bhargavi Karuthuri

Seasoned .NET Developer | 9+ Years of Hands-On Experience | Committed to Driving Innovation and Efficiency | Delivering Scalable Solutions for Complex Challenges | Dedicated to Excellence and Continuous Learning

Halifax, Nova Scotia, Canada

## Summary

As a Senior Software Engineer with 9+ years of experience, I have developed and delivered robust, scalable, and secure web applications using various .NET frameworks and technologies. I have a proven track record of solving complex problems, optimizing performance, and ensuring quality standards throughout the software development lifecycle.

My core competencies include C#, ASP.NET, MVC, .NET Core, Entity Framework, Dapper ORM, ADO.NET, LINQ, Web API, Bootstrap, CSS, WCF, JavaScript, jQuery, and Angular JS. I also have experience in MS SQL databases, NUnit testing, Postman and Swagger tools, Agile, Git, and Jira methodologies, and Azure CI/CD processes. Additionally, I have knowledge in Angular, Python, and Azure. I am passionate about learning new skills, exploring innovative solutions, and collaborating with diverse teams. I am looking for new opportunities to apply my expertise and contribute to impactful projects.

---

## Experience

Carelon Global Solutions  
Senior Software Engineer  
April 2023 - August 2023 (5 months)  
Hyderabad, Telangana, India

- \* Actively engaged with Product Managers to gather requirements and assess system impacts with Architects.
- \* Mentored junior developers, conducted comprehensive code reviews.
- \* Enhanced database efficiency by streamlining SQL queries and procedures, resulting in a decrease in execution time and overall improved performance.
- \* We have used LDAP (AD) authentication to authenticate the users.

- \* To maintain security, we always sanitize inputs and utilize parameterized queries.
- \* We deployed the code using a CI/CD pipeline for smoother deployments.
- \* Leveraged SSIS for efficient ETL processes, optimizing data integration and workflow automation.

## UST

### Senior Software Engineer

October 2021 - April 2023 (1 year 7 months)

Hyderabad, Telangana, India

- \* Collaborated with stakeholders to identify requirements and develop user stories in Agile.
- \* I played a significant role in upgrading the framework from the analysis phase through to production deployment.
- \* Analyzed system logs for debugging and proposed solutions for system improvements.
- \* Troubleshoot complex issues related to application performance optimization.
- \* Documented code changes and bug fixes using Git for version control.

## Infosys

### Technology Analyst

May 2016 - October 2021 (5 years 6 months)

- \* Implemented Token based (JWT) authentication to access the Web API's.
- \* Created web API services in .NET Core and utilized a testing framework (NUnit) to test them.
- \* Wrote automated unit tests using NUnit(Moq) and postman.
- \* Designed and implemented SSRS reports to provide comprehensive data analysis and visualization for stakeholders

## EC-Council

### Software Engineer

September 2015 - May 2016 (9 months)

## Confai Solutions Pvt. Ltd.

### Software Engineer

July 2014 - September 2015 (1 year 3 months)

## Gemshield Multitech Pvt Ltd

### Software Engineer

March 2013 - June 2014 (1 year 4 months)
